

Body Part	Reason for Exam	Coverage	Prep?	Comments	Procedure Name
ABDOMEN	Abdominal, flank, back, RUQ pain, Abdominal trauma, nausea, vomiting, Abnormal LFTs, jaundice, possible abdominal mass or organomegaly, metastatic disease, suspect congenital abnormalities	Liver, biliary system, gallbladder kidneys, pancreas, spleen, aorta, Inferior Vena Cava (IVC)	YES NPO 8 hours	No smoking or gum chewing prior to exam	US ABDOMEN
	Single organ, follow up, r/o hernia, superficial palpable lump	Single organ of interest, single quadrant of interest, follow up to prior exam	YES NPO 8 hours	Indicate which organ or quadrant, or location of superficial palpable lump. No smoking or gum chewing prior to exam.	US RUQ
	Pulsatile Abdominal mass, Follow up known AAA, r/o AAA on a non Medicare patient, Family Hx of AAA	Aorta	YES NPO 8 hours	No smoking or gum chewing prior to exam	US ABDOMINAL AORTIC ANEURYSM EVALUATION
	Abn. Creatinine, flank pain, hematuria, suspicion of kidney stones/pyelohephartis, hydronephrosis, bladder mass, Chronic kidney disease (CKD), Abnormal BUN	Kidneys, bladder, uterus	YES 24 oz. of water Finish 1/2 hour prior to appt.	Finish drinking water 1/2 hour prior to appt. time. Do not empty bladder.	US RENAL
	Evaluate for rejection, abnormal labs	Transplant kidney, artery, vein and native kidneys	No		US RENAL TRANSPLANT
	Portal HTN, abdominal varices, cirrhosis	Portal veins, hepatic veins, hepatic artery	YES NPO 8 hours	No smoking or gum chewing prior to exam	US ABDOMEN (Liver Doppler)
	Abdominal pain post prandial (after eating), Abdominal bruit	Celiac, hepatic, splenic, mesenteric arteries	YES NPO 8 hours	Patient drinks Ensure during exam	US DOPPLER MESENTERIC ARTERIES
PELVIS	Pelvic pain, abnormal bleeding, follow up mass seen on prior imaging, evaluation of ovarian cysts/mass, uterine fibroids, adnexal mass, endometrial abnormality, infertility, IUD check, suspect ectopic pregnancy	Uterus, ovaries, adnexal spaces	YES 32 oz of water Finish 1 hour prior to appt	Complete transabdominal and transvaginal exams performed. Finish drinking water 1 hour prior to appt. Do not empty bladder.	US PELVIC
SCROTUM/TESTICLES	Palpable mass, pain, swelling, redness, symptoms of torsion, abscess, undescended testes, infertility	Scrotum, testicles, epididymis	No		US SCROTUM
EXTREMITY	Lump, subcutaneous cyst, abscess, Baker's cyst, suspicion of foreign body	Targeted check of specific palpable lump of any extremity	No	Must indicate body part and diagnosis in comments to trigger correct protocol	US EXT NON VASCULAR
	Suspicion of DVT, redness, pain, swelling, positive Homan's sign, positive D-dimer, extremity circumference discrepancy, follow up to a known DVT or known PE (pulmonary embolism)	Deep and superficial veins	No		US DVT LOWER EXTREMITY BILATERAL US DVT LOWER EXTREMITY UNILATERAL US DVT UPPER EXTREMITY BILATERAL US DVT UPPER EXTREMITY UNILATERAL
	Pain, diminished or absent pulse, Suspect arterial disease	Subclavian, axillary, and brachial arteries	No		US ARM ARTERIAL DUPLEX BILATERAL US ARM ARTERIAL DUPLEX UNILATERAL
	Rest pain, claudication, non-healing ulcers, diabetes, suspect arterial disease	External, common femoral, superficial femoral, popliteal art	No		US ARTERIAL LOWER EXTREMITY BILATERAL US ARTERIAL LOWER EXTREMITY UNILATERAL

Body Part	Reason for Exam	Coverage	Prep?	Comments	Procedure Name
NECK	Palpable mass, swelling of the neck, goiter, abnormal labs, abnormality seen on other imaging study, follow up	Thyroid and surrounding soft tissue	No		US THYROID
	Palpable mass, swelling of the neck follow up, abnormal labs, abnormality seen on other imaging study	Parotid gland, palpable mass	No		US SOFT TISSUE NECK
	Evaluate for stenosis, Bruit, Hx of stroke, CAD, HTN, smoker, pulsatile neck mass, trauma, dizziness, amaurosis fugax, follow up, TIA	Carotid, subclavian and vertebral arteries	No		US CAROTID
OB	Evaluation of first trimester pregnancy, dating, bleeding	Uterus, fetus, gestational sac, ovaries, adnexal spaces	YES 32 oz of water	Finish drinking water 1 hour prior to appt. Do not empty bladder.	US OB, EARLY
	Evaluation of second trimester pregnancy, dates, fetal anatomy survey, size, placenta, fluid, and cervix. Routine survey	Uterus, cervix, fetus, adnexal spaces	YES 32 oz of water Finish 1 hour prior to appt	Complete OB scan for anatomy, size and dates. Routine survey is performed at 20 weeks. Finish drinking water 1 hour prior to appt. Do not empty bladder.	US OB, 20 WK ANATOMY
	1 or 2 specific concerns such as: fetal size/age or AFI or Targeted anatomy or bleeding, or IUGR or SROM	Very specific area of concerns	YES 32 oz of water Finish 1 hour prior to appt	Finish drinking 1 hour prior to appt. Enter specific indications in comments section. Only 1 or 2 specific concerns. Do not empty bladder.	US OB, LIMITED (AFI, POSITION)
	1 or 2 specific concerns for a patient who had a survey. Typically performed following a survey to evaluate anatomy not previous seen due to fetal position or early gestational age.	Limited to the portions of a complete survey that could not be seen previously	No	Enter specific indications in comments section. Prior images and reports must be present at time of scan. If not available entire survey may be repeated.	US OB F/U FOR GROWTH
	Checks fetal well being	Fetal tone, fetal movement, amniotic fluid and fetal breathing	No		US OB, BPP W/O NST
AXILLA	Palpable lump, abnormal prior imaging	Lymph nodes & axilla area	No		US AXILLA
